DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 16-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear of how to get the magnetic field to shift the ferromagnetic body in a switch-closed or switch-open orientation by only a single magnetic assembly mounted in the first member as claimed in the independent claims 16 and 23. As described in the specification, it requires to have an external magnetic element or a second magnetic element mounted on the second member for providing that magnetic field strength as the movement relationship between the first member and the second member. In other words, the independent claims 16 and 24 are not functionally properly without the second magnet element mounted on the second member or the external magnetic element.
